Summary:

HOW IT WORKS

If you offer a service to sell Downloadable Files such as software, eBooks, music, podcasts, movies, digital art, manuals, articles, certificates, forms, files, and more, and in the event that your customer does not receive their Downloadable Link automatically or for some unforeseen reason, then this product is very helpfulfor you.

On your Admin control panel - simply enter their "email address" that was used to purchase your product(s) and the link to the "downloadable file". They will then be able to download your product instantly, via email.

Place a ?Download Box? at the TOP of all your web pages for easier access.

It doesn't get much easier than that.

Without our Download Box, typically buyers may purchase and click on item to download files right away and the download now function sometimes does not work. This is an incompatibility fault and not a fault of the seller. Using the Download Box ensures that your customers are able to get your download right away. Once you enter their information on your Control Panel this software will know that they have paid. Customers will then be able to download from using the Download Box in this listing.

Depending on some email accounts the customer may also receive an email containing your downloadable link, but it sometimes ends up in their Bulk Mail, Spam Blocked or ends up getting bounced back. AOL and Hotmail users may not receive an email with their download link. That's why we have put the Download Box in this listing, so that your customers can get your download automatically via email.
